Project Part 1
CSCE 240: Web Applications
Ava Sanchez

Name of website: Fresh Renewed Wellness

Description of topic: My website will be for a Luxurious Wellness center called Fresh Renewed Wellness. The Wellness center will offer many beauty services such as filler, weight loss therapy, facials, as well as a massage spa. From the client's side they will be able to look at all the tabs available the services offered, view an "About Us" page and "Contact Us" page, etc. The client will also be able to login to their accounts or create one to add services to their cart and schedule appointments. The client will also be able to contact through the website. From the server's side all this information will be stored in order to confirm the appointments.

A list of each of the page names:
1. Main Page
2. About Us
3. Services
4. Scheduling appointments/Cart
5. Contact Us

A description of the data you will be storing, manipulating and viewing:

For this website there will be a large amount of data that is stored in the server side such as, the users accounts, the appointments will be stored into the cart for the clients to schedule, the price will also be displayed for each service and move to the cart, the times available for appointments, as well as the description and name of the service that is offered.
